EXP 6	Workflow Automation using Deluge

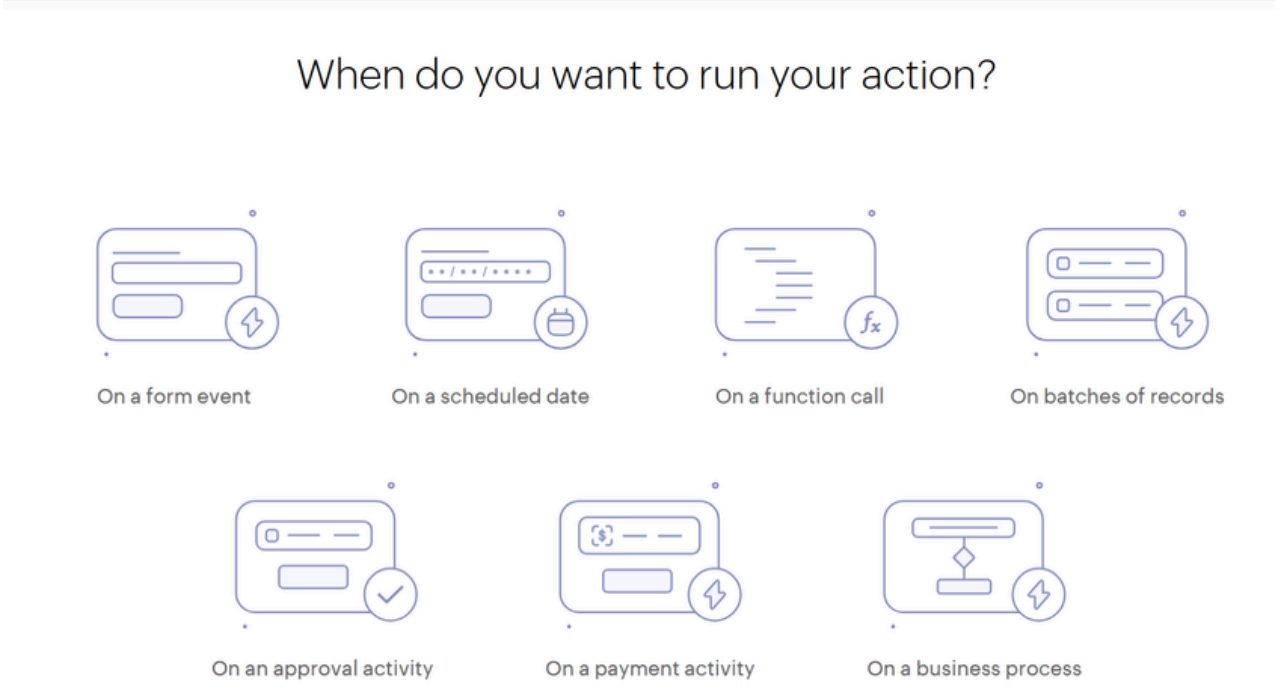

AIM

To design and implement a complete automation layer in Zoho Creator for the Hotel Room Booking application using all eight Workflow options to automate the booking lifecycle.

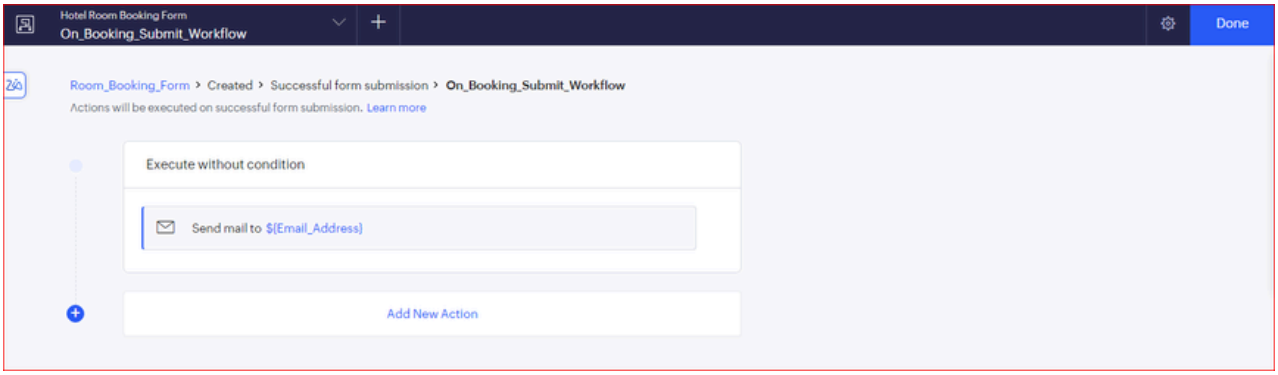

PROCEDURE:

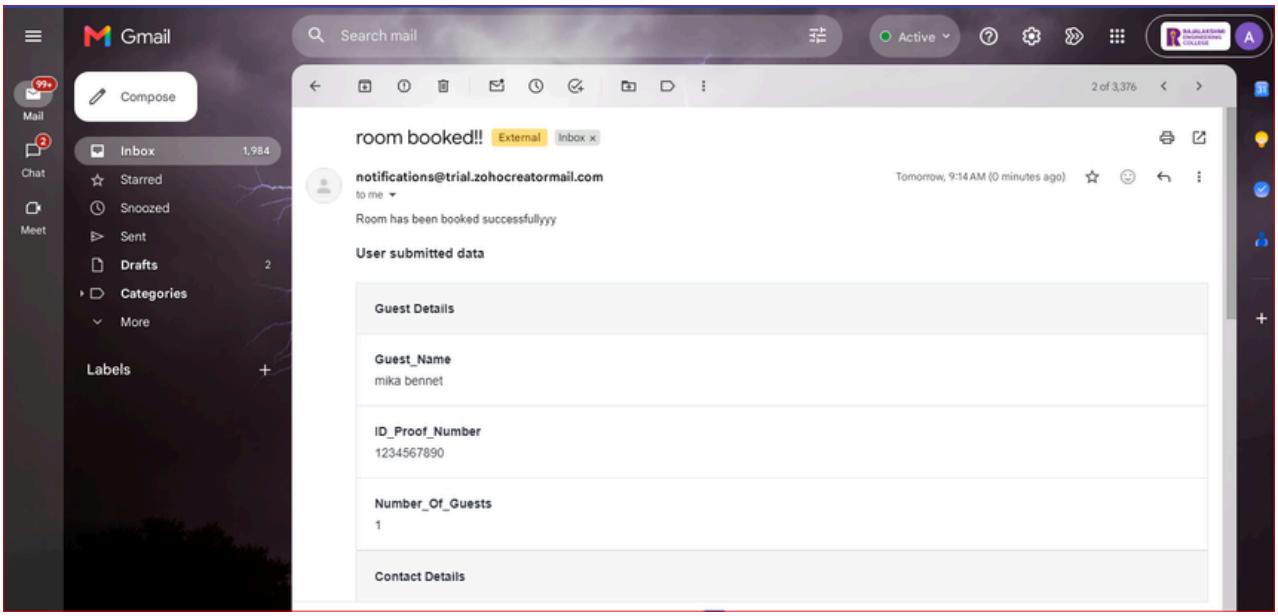

1. Logged in to Zoho Creator and opened the Hotel Room Booking application.
2. Opened the existing Room_Booking_Form and Room_Booking_Report.
3. Created a Form Workflow for automatic booking confirmation.
4. Created a Schedule for daily check-in reminders.
5. Configured an Approval workflow for complimentary upgrades and discounts.
6. Configured Payments for advance payment collection.
7. Created a Blueprint for the booking lifecycle: Enquiry → Confirmed → Checked-In → Checked-Out.
8. Created a Batch Workflow for post-stay feedback requests.
9. Created a Report Workflow to recalculate the payable balance when tariff or discount is edited.
10. Created a reusable Function to generate and email the final invoice.
11. Tested the workflows with sample booking records and verified the automated actions.

FUNCTIONS

CONCLUSION

Thus, all eight Zoho Creator workflow options were successfully configured, automating booking confirmations, payments, approvals, status transitions, reminders, feedback, billing, and invoice generation with minimal manual intervention
